Furkan Tunalı Résumé

Summary

I've been developing the web whether it's front-end, back-end, or designing things in multidisciplinary ways, mentoring, consulting or handling clients more than ten years.

As years went by and I've become more enthusiastic and experienced, I honed my skills within the projects, companies or clients that I've worked on the web field without strict limiting my area of work.

More recently, my primary focus has leaned towards developing software with JavaScript besides building and managing front-end architectures.
